

HERCULES DUO

Scale faster with the Hercules portfolio management platform featuring built-in RMS.

Reduce failed transactions, increase ATM usage, and decrease tech dispatches. Known for its consistency and reliability (especially in fringe areas), the Hercules platform is referred to as the “gold standard” amongst ATM operators.

RMS Minus the Cost and Complexity

Level the playing field with Hercules RMS for your entire fleet - regardless of manufacturer - included with every Hercules and setup in minutes.

- Resolve transaction disputes
- View cash levels & forecasts
- Set & adjust bill counts
- View Terminal IDs
- Review e-journals
- View ATM errors
- View ATM status
- And more!

High Availability Design

The Hercules Duo is a 4G LTE CAT-4, dual carrier (including 2 SIMs), dual Ethernet, high throughput modem, ideal for applications requiring faster speeds and higher throughput such as bitcoin ATMs (BTMs), interactive teller machines (ITMs), and digital signage. The Hercules Duo’s dual SIM/carrier feature makes it ideal for fringe areas and high volume locations requiring high network availability or redundancy. Its two Ethernet ports allow it to provide multi-service support for auxiliary devices such as video toppers, or it can be configured for WAN Failover.
